

SCREEN MIRRORING WITH AN APPLE TV: PHONE, TABLET OR MACBOOK DEVICES

How to stream using a phone or tablet:

Step 1: Ensure your iOS device and your Apple TV are on the same wi-fi network.

Step 2: Swipe up from the bottom of your iOS device to reveal the control centre, select Screen Mirroring.

Step 3: Select the Apple TV you want to connect to.

Step 4: The Apple TV will then display a passcode, which you'll need to enter into your device. Once you have done this your device's screen will now be mirrored to the TV.

NB: If you can't see Screen Mirroring in your control centre, it may mean the version of iOS your device is running does not support it.

How to stream using a MacBook:

Step 1: Click the AirPlay icon on the MacBook's menu bar.

Step 2: Select the Apple TV you want to connect to from the dropdown menu.

Step 3: Select the Apple TV input on your TV to start mirroring your MacBook's screen to the TV. Once connected, you can select Mirror Built-in Display (which will set the resolution to the same as your MacBook) or Mirror Apple TV (which will use your TV's maximum resolution).
